

Are you needing advice on home modifications to help you manage in the home?

Liz Ainsworth is an Occupational Therapist and Access Consultant with over 20 years experience providing services to people requiring home modifications

Home modifications are structural changes to your home that can be made by a builder, to help improve your health, safety, independence and to make life easier. Home modifications should enable you to stay in your residence for as long as possible and not detract from the “look” and “feel” of your home. They should be elegant and add to the value of your property.

Home Modification Process:

1 Initial Referral - Phone 0408 781 554 or email - info@homedesignforliving.com

Liz can talk to you about your needs and plan a time to meet you in your home.

2 Initial Visit - Seeing You At Home Liz can visit you in the home and discuss:

- how you are managing with your everyday activities
- the challenges you might be having with the layout of your home and the tasks you are completing
- possible solutions to suit your needs - equipment options, a different way of doing a task, support from other services or modifications for your home
- funding options available from government or non-government organisations
- builders/designers/architects who you can contact to provide quotes for maintenance and home modification work

She will observe how you manage around the home, and measure you and your equipment, and the home environment. This information helps her to provide information on products and layout of the home that are the best “fit” for you and for other members of the household.

She will discuss whether a second visit is required and the level of expertise required for works completion. Information can be provided about how and where to source builders/designers/architects.

3 Second Visit - Involving the Design / Construction Professional

Liz can do a second visit with the builder/designer/architect to inspect and discuss the areas of concern and provide information on whether the home modifications can be achieved with ease. She can suggest specific products, designs and finishes to best suit your needs. The builder/designer/architect can provide technical advice, plans, a specification and costings for works completion based on Liz's recommendations.

4 Works Completion

Liz is available to visit you at the conclusion of the home modification process to check the home modification to ensure it suits your needs and to provide any advice about changes, to the builder.
